Professional Summary

A highly motivated, organized, and detail-oriented Risk Manager with 5-year experience in Database Risk Management, Risk Analytics, Data Governance, Data Management, Business Analytics. Recognized as Top Tier performer at Amazon in fiscal year 2021 and 2022.

Professional Experience

Amazon – Asia Global Selling

Shanghai, China

September, 2021 – March, 2025

- Risk Control & Management | Risk Management Manager

- Managed database logical access and IMR cost by developing a QuickSight dashboard, including tracking execution minutes, CPU Spike, job growth, database connections, priority downgrade, bad user behavior analysis and node health check. Sufficiently reduced IMR cost by 30.5%.
- Developed NLP model to train the seller messages and feedbacks of the company's social media posts and delivered a QuickSight dashboard to provide insights regarding feedback sentiment tone, FAQ, trending keywords and hot business topics to manage marketing campaigns.
- Conducted the analysis regarding the opportunities for the top brand sellers cross launch to emerging marketplaces, and the product cold-start selection.
- Conducted the DML project to better manage sellers' deal/coupon sourcing process during the Black Friday Cyber Monday event. Measured the causal effect of adopting best deals on revenue uplift and sufficiently reduced inefficiency of deal sourcing process.
- Established the data pipeline of ETL Manager, Python, AWS S3 and Athena to process seller PII data for semi-automated vetting of seller launches. It helped more than 400 account managers to reduce their manual effort by saving 200 hours in total.
- Built timely business reports and dashboards with visualization by using SQL ETL extensively to integrate and analyze data from various databases to get insight into the business and measure the success of the top brand seller's business.
- Drove different business decisions by using scientific analytics models via Python (e.g., AB testing, Time series analysis, retrospective estimate of marketplace intervention) to solve loosely defined problems independently and measure the impact on business
- Developed an excel goal template based on regression model to help the business team reduce manual efforts in goal setting process.

PricewaterhouseCoopers Business Consulting Co. Ltd

Shanghai, China

June, 2021 - September, 2021

- Risk Assurance | Cybersecurity | Senior Associate

- Conducted and delivered high-quality report of Third-party Information Security Assessment for Apple's assembling suppliers (Foxconn Tech & Pegatron). Documented the risks and the exception remediation plan.
- Conducted Multi-Level Protection Scheme (MLPS) assessment of U.S. Insurance Company including on-site interviews, assessing the IT security architecture by testing controls, identifying risk and providing remediation recommendations.
- Conducted TISAX assessment for NGK. Helped client to remediate the risks and established compliance policies. Worked with client to obtain the TISAX certificate eventually.

KPMG LLP Canada

Toronto, Canada

July, 2019 - September, 2020

- Technology Risk Consulting | Consultant

- Provided IT support for integrated SOX and financial statement audits, including one of Canada's largest banks (Bank of Nova Scotia, Corporate Lending segment), and completed all testings by using only 50% of budgeted time.
- Worked with the financial audit team and client to finalize the in-scope data flow processes for relative IT applications and databases. Increased 5% of engagement revenue by expanding the scope of testings.
- Managed and performed all work independently for one engagement, which effectively deducted the cost of engagement by 20%.
- Conducted walkthrough meetings independently to obtain comprehensive knowledge of new processes, identified IT deficiencies and mitigating factors to present to the client/financial audit team for new IT processes (includes system interface, report reconciliation, etc.).
- Conducted testing in terms of General IT Controls including Access Controls (Logical & Physical access), Change Management, Project Development (SDLC & Agile) and Computer Operations for Windows, SQL database and Mainframe.
- Conducted testing in terms of IT Automated Controls including system interface, report reconciliation, etc., to ensure the completeness and accuracy of the data that flows among the different financial applications.
- Conducted SOC (System and Organization Controls Report) Audit which includes executing Security, Confidentiality and Availability controls for SOC 2 reports to give reasonable assurance of the IT systems. Completed SOC 1 and SOC 2 reports.
